

A. Active pediatric spectra and supplementary references

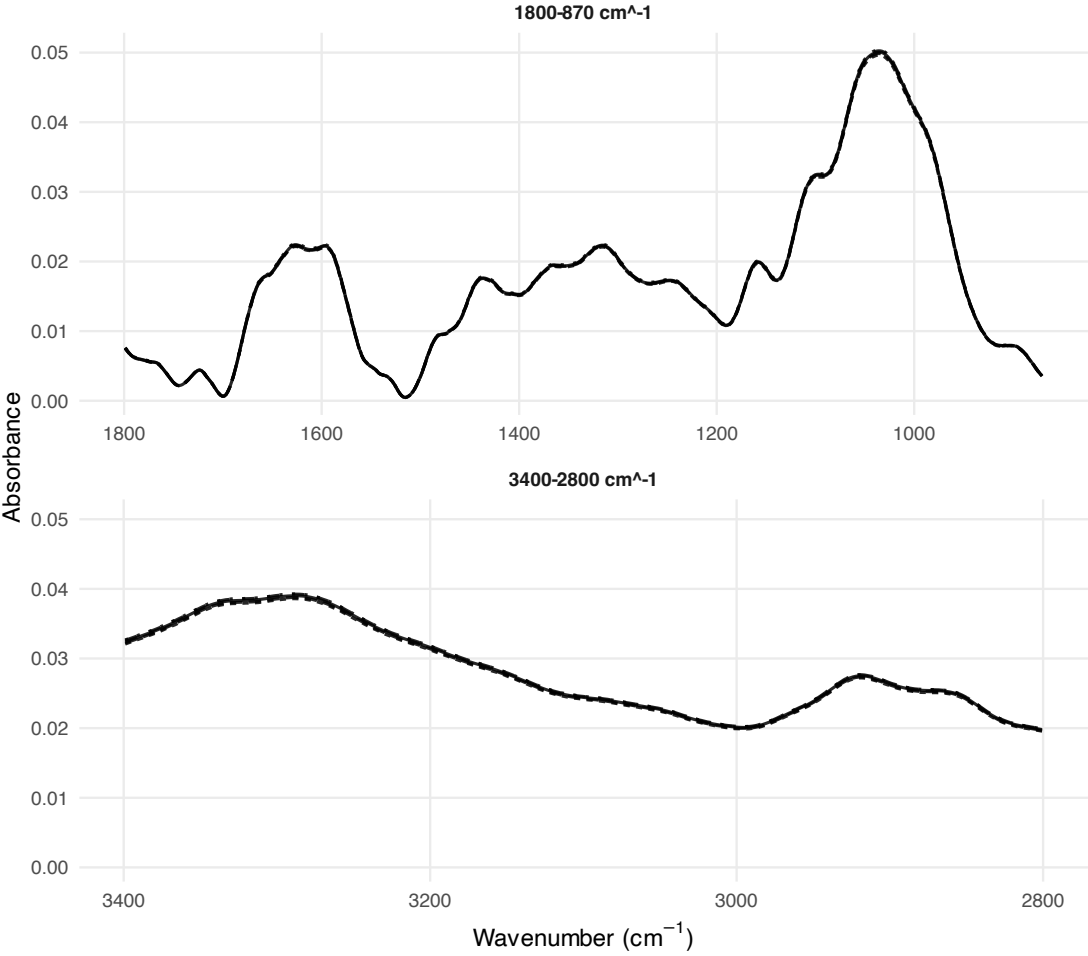

B. Distance of clean-strip references to cluster centroids

All individual clean references identify Cluster 1 as nearest

C. Reproducibility of independent unused strips

Reference — archived_etalon - - - strip_01 - - - strip_02 - - - strip_03 ··· strip_04

Four unused strips: minimum pairwise Pearson $r = 0.999989$; minimum Spearman $\rho = 0.9999822$; integrated absorbance CV = 0.82%; median
